## Bachelor's Degree in Chemistry, Pre-Professional Option

The Bachelor's degree in Chemistry with a Pre-Professional option is our most flexible program. The credit hours for electives allow students to pursue a minor in another subject or take a variety of courses in subjects that interest them. With these options, students can customize a degree program to suit their career goals.

Chemists work in research, clinical, and testing laboratories and perform outdoor field work. Chemists are employed as scientific and technical writers and as sales consultants for companies that provide goods and services to the chemical industry. The Pre-Professional option is appropriate for students interested in graduate school as well.

## Bachelor's Degree in Chemistry, ACS Certified Option

The American Chemical Society (ACS) certifies that this VSU Chemistry degree option meets the highest standards for chemistry education. We offer this certification for both Chemistry and Biochemistry options. These are the most rigorous degree options and are appropriate for the student pursuing a Master's
 (MS) or doctorate ( PhD ) in Chemistry graduate school or a career as a chemical researcher. The Biochemistry option, discussed on another page, includes several additional courses in biology that prepare the student for a career in pharmaceutical or medical research.

Typical Four-Year Degree Program

Since this degree option is designed for students pursuing graduate school and a career in research, we highly recommend that students enroll in at least one semester of undergraduate research (CHEM 4910). Calculus-based physics (PHYS 2221 and 2222) will better prepare the student for graduate courses.

\section*{Bachelor's Degree in Chemistry, Business Option}

The chemical industry employs millions of workers and is a significant part of the global economy. The Chemistry degree with a Business option prepares students with skills and knowledge to be a successful chemist and entrepreneur. Students will also receive the new Certificate in Entrepreneurship from the Langdale
 College of Business.

Students pursuing the Business option develop a strong foundation in Chemistry. We design the degree program to be flexible so that students can also take business courses that fit their career goals in entrepreneurship and international business.

\section*{Bachelor's Degree in Chemistry, Environmental Option}

Chemists can make a difference in the world by designing more environmentally friendly chemical reactions, harnessing alternative sources of energy to reduce fossil fuel emissions, and creating sustainable materials. If these sound like interesting and rewarding goals, a VSU Chemistry degree with an Environmental option is the
 right choice for you.

The Environmental option provides you with a well-rounded education in Chemistry along with courses that are essential to your career as an environmental chemist. You will also learn nontechnical skills, such as environmental ethics and philosophy that provide the knowledge you need to make wise decisions that help our planet.

\title{
Bachelor's Degree in Chemistry, Pre-Dental Option
}

The Bachelor's degree in Chemistry with a Pre-Dental option prepares students for admission to dental schools in Georgia and across the country, where they can earn a Doctorate in Dental Medicine (DMD) to become a dentist. Dental schools offer other degrees too, such as a doctorate in oral biology, a DMD with a
 concentration in business, and a doctorate in medicine (MD) with additional training in oral surgery.

Students pursuing the Pre-Dental option develop a strong foundation in Chemistry. We design the degree program to be flexible so that students can also take additional courses in biology to boost their performance on their admissions exam and dental school coursework.

\section*{Bachelor's Degree in Chemistry, Pre-Medical Option}

The Bachelor's degree in Chemistry with a Pre-Medical option prepares students for admission to all medical schools in Georgia, where they can earn a Doctorate in Medicine (MD). With this degree, a student can become a physician or medical researcher.

Students pursuing the Pre-Medical option develop a strong foundation in Chemistry. We design the degree program to be flexible so that students can also take additional courses to boost their performance on the MCAT and medical school coursework.

\title{
Bachelor's Degree in Chemistry, Pre-Pharmacy Option
}

The Bachelor's degree in Chemistry with a Pre-Pharmacy option prepares students for admission to pharmacy school and a Doctorate in Pharmacy (PharmD) degree. Pre-Pharmacy is one of our most popular degree options because pharmacists are in high demand and enjoy a rewarding career. Pharmacy schools in Georgia seek
 out our Chemistry graduates because of their strong work ethic, maturity, and Chemistry knowledge.

Students pursuing the Pre-Pharmacy option develop a strong foundation in Chemistry. We design the degree program to be flexible so that students can also take additional courses in order to qualify for admission to the specific pharmacy school of their choice.

\({ }^{1}\) Students seeking a PharmD degree must verify that their course selection satisfies both VSU graduation and PharmD entrance requirements.

Must make a C or better in major courses and math. Courses are recommended based on admission standards of many pharmacy schools in Georgia. Check PharmD program admissions requirements to make sure that you enroll in the correct elective courses that satisfy their pre-requisites.

\section*{Bachelor's Degree in Chemistry, Teaching Option}

Every successful scientist can name a teacher who inspired them. That teacher could be you! A VSU Bachelor's degree in Chemistry provides you with a wellrounded education in Chemistry in the classroom and the laboratory. The Teaching option adds education classes which prepare you for pursuing teacher certification
 and a Master of Arts in Teaching (MAT) degree that you can earn at VSU also.

Teaching is a rewarding career that is always in demand, especially for Chemistry and other science disciplines. Make a difference every day in the lives of your students by sharing with them your knowledge and passion for Chemistry.
