

## Valdosta State University Invites You to Enjoy with Us the Trip into Our Next Century!

This trip will last approximately twenty-four months and will take you through a transformation of our campus which will include the demolition of several long-standing buildings, the construction of seven new building, and the renovation of one building. The buildings to be demolished are Hopper Hall, Georgia Hall, and the Old Gym. The new buildings will include a student union, Hopper Hall replacement, Georgia Hall replacement, student health center, an athletic field house facility, two parking decks, and a renovated Reade Hall.

We will use these pages to keep you informed and updated as these projects progress. Throughout the changes our primary goal will be to ensure your safety and convenience. Signs will be posted at each project explaining what the project is and the anticipated completion date. We will work hard to foresee possible inconveniences to you as a result of the construction. Directional signs will be posted to guide you along easy paths leading you to your destinations. We know that you will have suggestions as to how we might better accomplish this goal and therefore request in advance that you communicate with us often and freely. Let us know what we can do to make your movement about campus easier and safer. You may do so by emailing us at [construction@valdosta.edu](mailto:construction@valdosta.edu).

Detailed information about these upcoming changes may be found at [www.valdosta.edu/finadmin/your-space](http://www.valdosta.edu/finadmin/your-space).

We appreciate your patience and understanding.

***James L. Black***

Vice President for Finance and Administration  
and Assistant Professor Emeritus of Modern and Classical Languages
