

PeopleSoft 8.9 Budget Checking Message Explanation and Correction

Message	Type	Explanation	Correction
Exceeds Control Budget	ERROR	The transaction is for more than the available remaining funds on this APPROPRIATIONS budget line. You must correct the problem before you can complete the transaction.	<p>1) Be certain the chart field is correct. The best way to do this is compare it with the Budget Progress Report to be certain each piece is correct.</p> <p>2) Submit a Budget Amendment Request to increase the budget so there is sufficient remaining available to fund this transaction. For instance, if there is a remaining of \$200 on the Travel line (600000) and this transaction is for \$345 then an amendment needs to be submitted to move \$145 to this line from another budget where there is available remaining.</p>
No Budget Exists	ERROR	The chart field as entered does not exist in the accounting program. You must correct the problem before you can complete the transaction.	<p>1) Be certain the chart field is correct.</p> <p>2) Submit a Budget Amendment Request to create the chart field in accounting. In this instance an amount at least equal to the total amount of this transaction will need to be moved to the Appropriations line from another line with a remaining amount available. Since the line does not exist, there is zero available and the full \$345 will need to be amended.</p>
Exceeds Non-Control Budget	WARNING	The transaction is for more than the available remaining funds on this ORGANIZATIONAL budget line	This warning does not require any action on your part. Just click OK and continue processing the transaction.
