

Expression Web Basics

Expression Web is Microsoft's replacement package for FrontPage for web site design. At VSU Expression Web is used to create faculty/staff personal web pages. Expression Web cannot be used to edit any VSU departmental web pages - only Contribute can be used. Topics covered include:

- Introduce Expression Web and HTML concepts
- Discuss Expression Web window and task panes
- Identify the url format for faculty/staff personal web pages
- Create, edit and save a personal web site and web pages
- Preview web pages in browser
- Format web pages
- Create, edit and remove hyperlinks and bookmarks
- Insert and edit images
- Publish personal web page
