

Converting videos to WMV on the Mac for use with Communicoach:

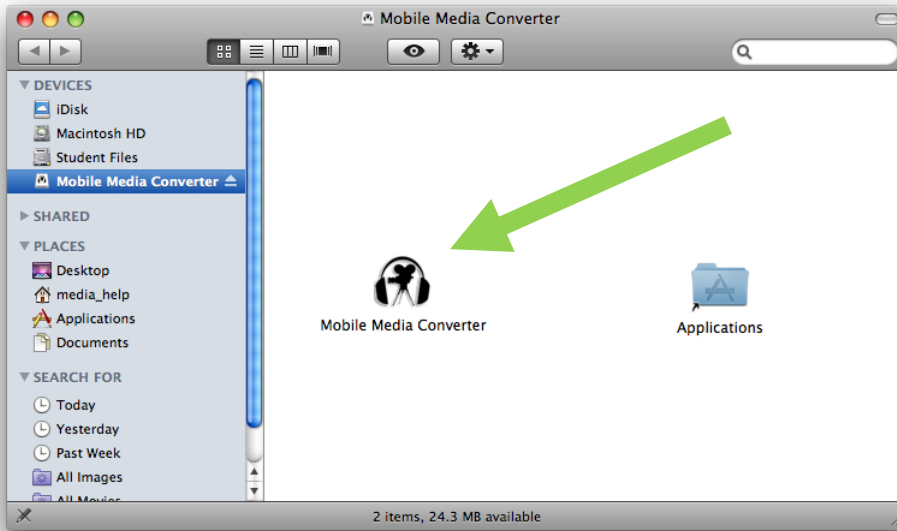

Go to <http://www.miksoft.net/mobileMediaConverterDown.htm>

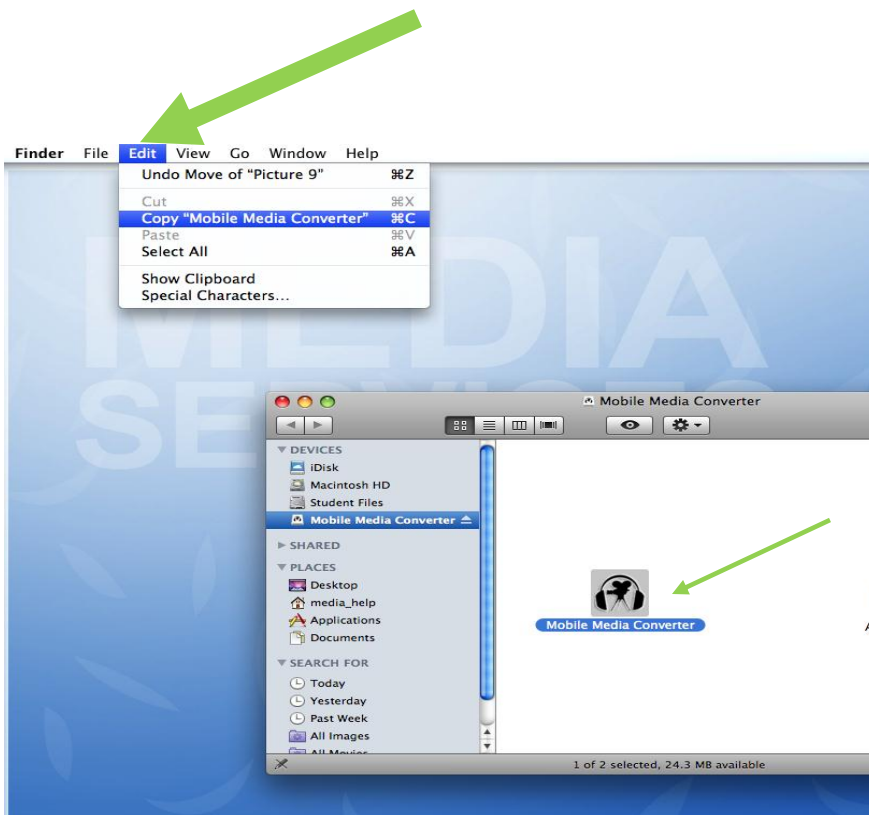

Click on “for Mac OS X” After clicking that link the download should begin.

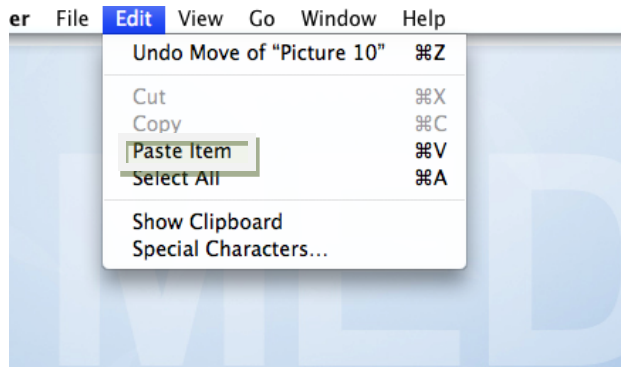

*After the download has completed a pop up window will appear titled “Mobile Media Converter”*

In order to properly install Mobile Media Converter you need to click on the icon for Mobile Media Converter then go to Edit at the top of your screen and select Copy "Mobile Media Converter"

Now click to open the Applications shortcut in the same folder. After Applications has opened, go to Edit at the top of your screen and select Paste Item

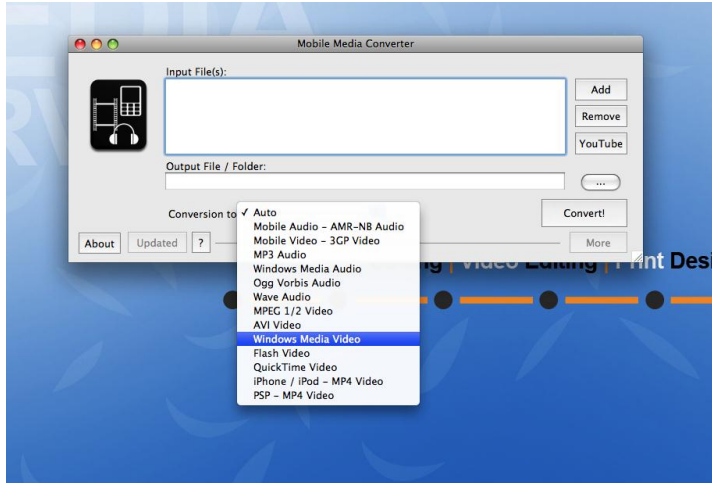

Once the copy and paste has completed, launch Mobile Media Converter

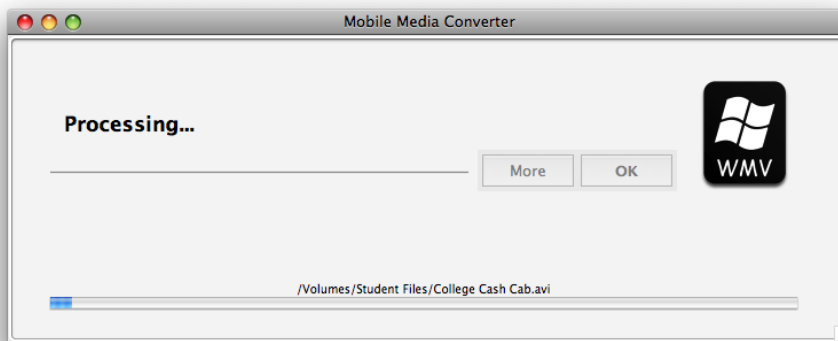

A notification will pop up warning you that the file was downloaded from the Internet. Click Open. The file is safe.

Mobile Media Converter will open. You may now add your video clip to the box where it says Input File(s). You can add your video either by dragging the video from its current location or clicking the add button and navigating to where you saved the video. Once the video appears in the “Input File(s)” box click the conversion to button. Select Windows Media Video.

After you have selected Windows Media Video click convert. The conversion process will begin.

After the video conversion has completed your video will be located in the same location as the original video file but will end in “.wmv” This “.wmv” can then be uploaded to communicoach.
