**LIBRARY ACQUISITIONS - FISCAL YEARS 1994 THROUGH 1996**

Description: The Library, completed in 1972, is the center of academic life for the campus. Having 87,230 square feet, it houses approximately 387,692 bound volumes. The Library also contains nearly 3,000 current periodicals and newspapers, and a microform collection of more than 1.3 million units. The Library is a Selective Depository of U.S. Government publications and maps, has a special collection in the field of Southern History, and houses the archives of Contemporary South Georgia History.

## COMPUTER FACILITIES

The university operates a variety of sophisticated, state-of-the-art computing and networking facilities to support its academic, research and administrative activities. The facilities include several powerful UNIX-based central servers, many distributed file servers running Novell Netware, 2400 microcomputers and 50+ high-end workstations, all of which are interconnected via a high speed data network.

Located in the Computer Center in Nevins Hall, three Hewlett Packard (HP) 9000 large scale business servers, Models G50, G70, and K460 support all student and financial related processing, as well as various other applications software systems. To meet VSU's fast growth, these three computers together comprise a total systems environment that provides one of the largest and most modern centers in the University System. As one of the first senior schools to receive the fourth-generation Banner Student Information and Financial Aid Systems, VSU has fully implemented these systems to greatly enhance student support operations such as admissions, registration, advising and financial aid processing. A new state-of-the-art Business and Financial Software System from Peoplesoft Corporation, also centrally procured by the Board of Regents, will be installed by VSU in FY 1998.

Housed in the Data Communications Center in Ashley Hall, one Sun SparcServer 1000E provides electronic mail services for the students, faculty and staff and access to the state-wide PeachNet and other national and international networks. A second Sun SparcServer 1000E provides Gopher, Listserv, Usenet and other similar services. A third Sun SparcServer 1000E provides World Wide Web services and operates as a specialized applications

server for several academic departments with software products such as AutoCad, MathLab, GIS, C++, LISP, and others. A fourth Sun SparcServer 1000 performs as the name server for the campus, allowing VSU to be 'registered' with Internet and utilize the short address of valdosta.edu.

A very extensive and sophisticated fiber-optic based data network, with its central hub of bridges and routers located in the Library, provides Ethernet/Fast Ethernet protocol (10MBps) communications between all servers and microcomputers. The 18 miles of fiber and 58 miles of copper wire connects the main campus buildings, as well as two on North Campus, the VSU Regional Center for Continuing Education and twelve buildings adjacent to the main campus. Other sites utilize dedicated modems to connect to the network. Additional remote dial-in modem access is supported, as well as outside access via PeachNet to other national and international networks.

Microcomputers are provided to every faculty member and all staff in administrative offices. A total of 600 microcomputers are available to students in 25 labs, with 10-50 machines each, located throughout the campus. Two labs are installed at Kings Bay Naval Base to support VSU operations at that location. All machines have campus standard software installed - Microsoft Office Pro (Word, Excel, Power Point, Access) and all communications products (Netscape, Eudora, and other). Various microcomputer servers, Sun and Silicon Graphics high-end workstations, local networks and other facilities are located in the colleges and administrative offices to provide additional support to students, faculty, and staff. The Library operates a DEC 4200 minicomputer, a Sun SparcServer 1000, a student micro lab, 20+ Galileo workstations and 30+ terminals to support their operations.
