**VSU Mathematics Index FAQs**

**Who is assigned a VSU Math Index?**

Most admitted students will have a VSU Math Index. Students with complete VSU admission data (SAT or ACR scores, etc.) are assigned a VSU Math Index.

**Who is not assigned a VSU Math Index?**

Students with incomplete VSU admissions data, such as missing SAT/ACT scores, are not assigned VSU Math Indices. For example, nontraditional students (students who have not been in school or college for 5 years or more) and international students who have not submitted SAT scores do not have a VSU Math Index.

**When is the VSU Math Index assigned?**

The VSU Math Index is assigned after you are admitted to VSU. The index is updated when more recent data, such as newer SAT scores, is received.

**When will you be notified of your math placement level?**

All students will be notified of their placement level after they are admitted to VSU.

**What you need to do:**

- **If you are satisfied with your placement level,** then you should meet with your advisor to discuss the mathematics requirement for your chosen major. Doing this will support you in selecting the best starting mathematics course.
- **If you are not satisfied with your placement level** and want to try to improve it, you should take the Mathematics Placement Exam. (There is more info on the Math Placement Exam on the Math Placement webpage provided by Centralized Advising at VSU).
