

Pearson+ eTextbook Setup in BlazeVIEW

Pearson+ requires additional setup to connect your BlazeVIEW course with the Pearson+ eTextbook platform. Unlike a traditional eTextbook, Pearson+ gives students access to a range of learning and engagement tools designed to support their success. In addition to reading the eTextbook online, students can listen to the audiobook version of the text, create highlights and notes, access study resources, and take advantage of other interactive learning features available within the platform.

To ensure students can access these materials and features on the first day of class, please follow the steps below to pair your BlazeVIEW course with Pearson+. Optionally, you can select learning activities in each chapter of the eTextbook to supplement your course materials.

Step 1: Open any module in your course and select the **Add Existing** button.

Step 2: Click the **External Tool Activity** button.

Step 3: Select **Access Pearson (1.3)**. An Access Pearson (1.3) item will be added to the table of contents in that module.

Insert an External Learning Tool	
LTI Link ▲	LTI Advantage Deployment
Access Pearson (1.3)	Pearson (1.3)
Aktiv	Aktiv

Step 4: From the Table of Contents, select **Access Pearson (1.3)**.

Step 5: Click on the blue **Access Pearson (1.3)** link located in the activity content.

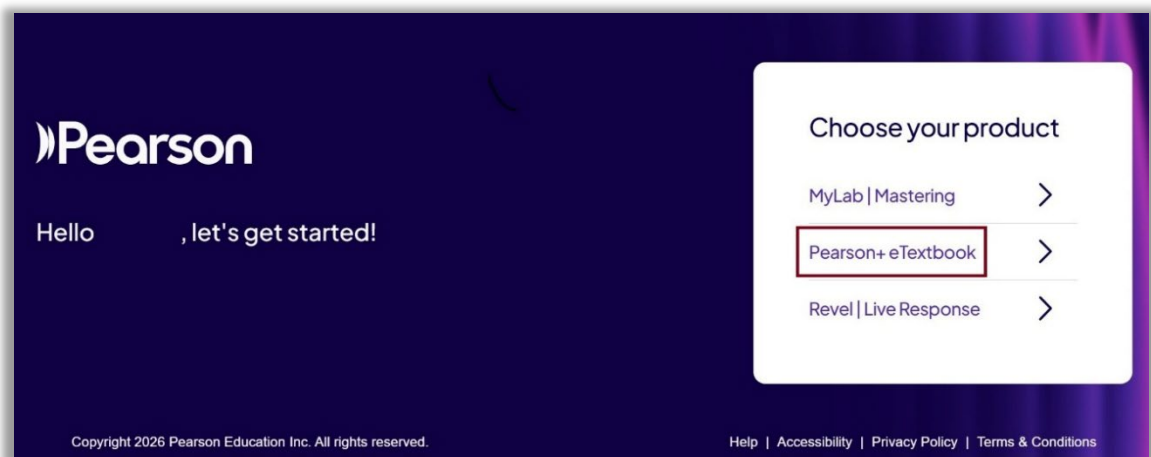

Step 6: Enter your Pearson account information and click **Link Accounts**. If you don't have a Pearson account, please use the **Create Account** link to create an account. **NOTE:** You must use your Valdosta.edu account.

Step 7: Once your accounts are linked, you will receive a confirmation. Click **Continue**.

Step 8: If prompted to “**Choose your product**”, select the **Pearson+ eTextbook**.

Step 9: Click **Create course**.

Step 11: After the course has been created, you should see a banner for the eBook. Click on the **Open eTextbook** button for access.

The screenshot shows the LMS course interface. At the top, a banner displays "Your Course Name Here" and "ent Summer 2026". Below this, a section titled "Your Course eBook Listed" features a book cover for "Classroom Management for Elementary Teachers", a "Go to page 2" button, and an "Open eTextbook" button. A "Welcome!" message follows, stating "Your Pearson eTextbook is now linked to your LMS course". Below this, three options are listed: "Create assignments" (Assign chapters manually or by uploading your syllabus.), "Explore insights" (See exactly which topics your class is struggling with.), and "Track performance in your LMS" (Choose grade sync settings in your LMS course.). A "Step OPTIONAL" box is also present. A "Get started →" button is located at the bottom right.

OPTIONAL: Click on the **Get started** button. On the **Create Assignments** page, check the chapters you want to cover and assign them. According to Pearson, there aren't any assignments in the traditional sense. You can assign the chapters to be due on your chosen due dates, or you can make them available until the end of the semester. Questions are embedded throughout the readings, but they are for students' own learning and self-assessment.

The screenshot shows the "Create assignments" page. It has two tabs: "Add manually" and "Upload syllabus". Below the tabs, there are fields for "Due date" (DD/MM/YY), "Due time" (11 : 59 pm), and "Time zone" (EDT(UTC-05)). A section titled "Select the chapters or sections" lists several chapters with checkboxes: "Cover", "Preface", "Chapter 1: Exception...", "Chapter 2: Current Practices for Meeting the Needs of Exception...", "Chapter 3: Multicultural Competence in Special Education", and "Chapter 4: Parents and Families". A large orange box with a red border is overlaid on the right side of the page, containing the text: "Your eBook Chapters Listed Here. Select activities in each chapter to create assignments."
