

Below are the steps that an Instructor will need to create uCertify course deeplinks.

1. Open the course shell on D2L and click on the Content tab.
2. Now create a Module and then click on the Existing Activities drop-down and then select uCertify Quick Link from the list.

It will redirect you to the Select Course and Master Section page of uCertify. You will see all your My Library courses here.

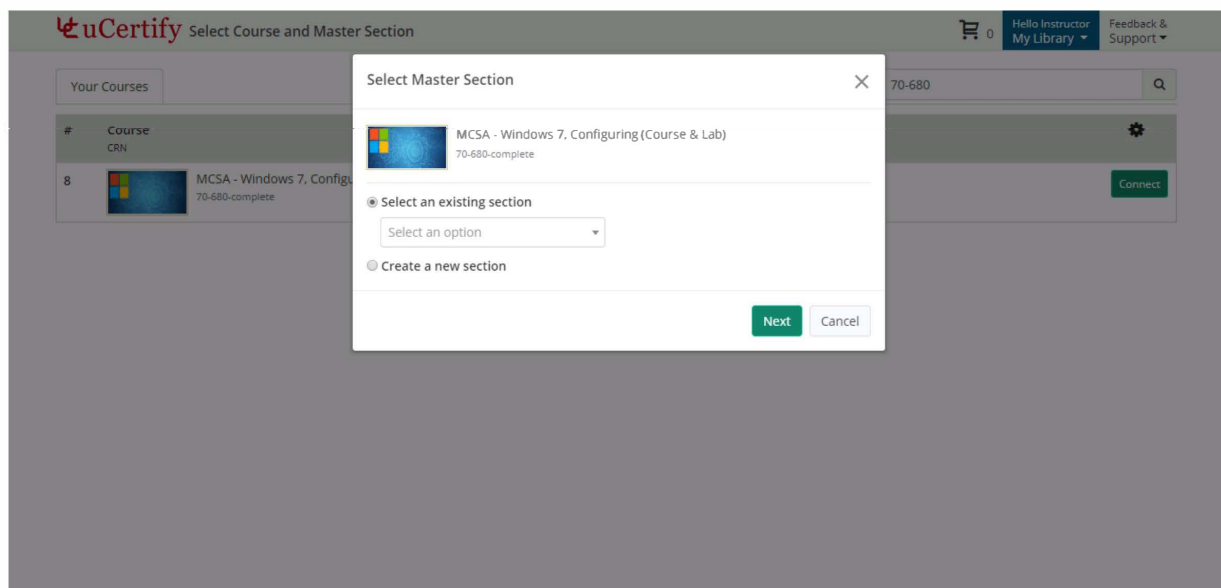

Search your course using the course CRN in the search textbox.

Note: If you are enrolled in the searched course, you will see a Continue button.

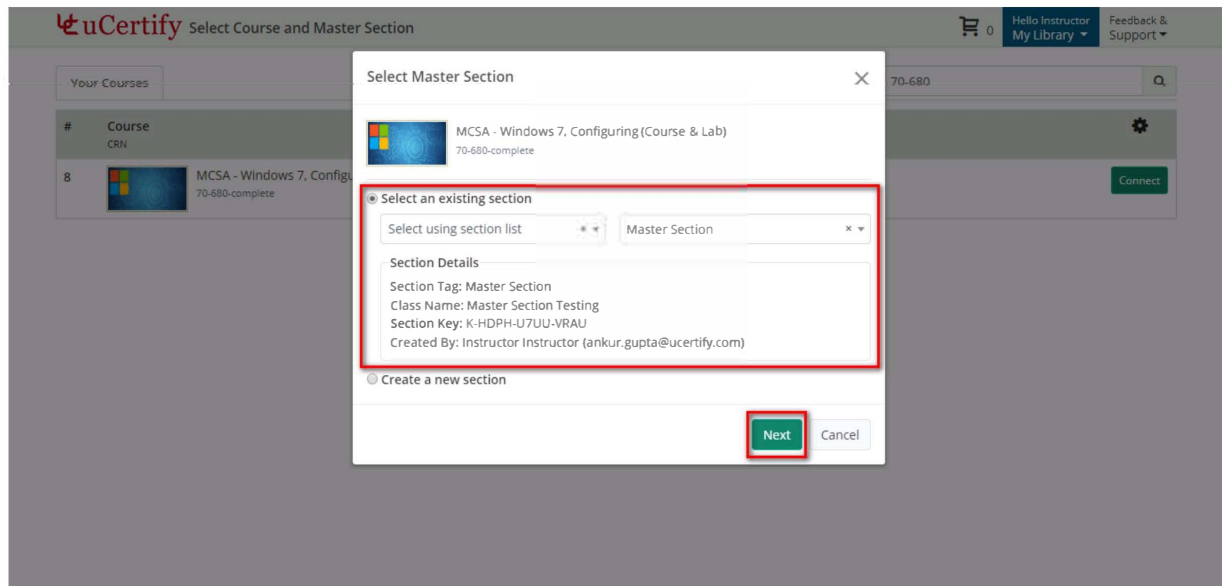

Otherwise, you will see a Add To My Library button. Click the Add to My Library button to enroll in the course and then theContinue button will appear.

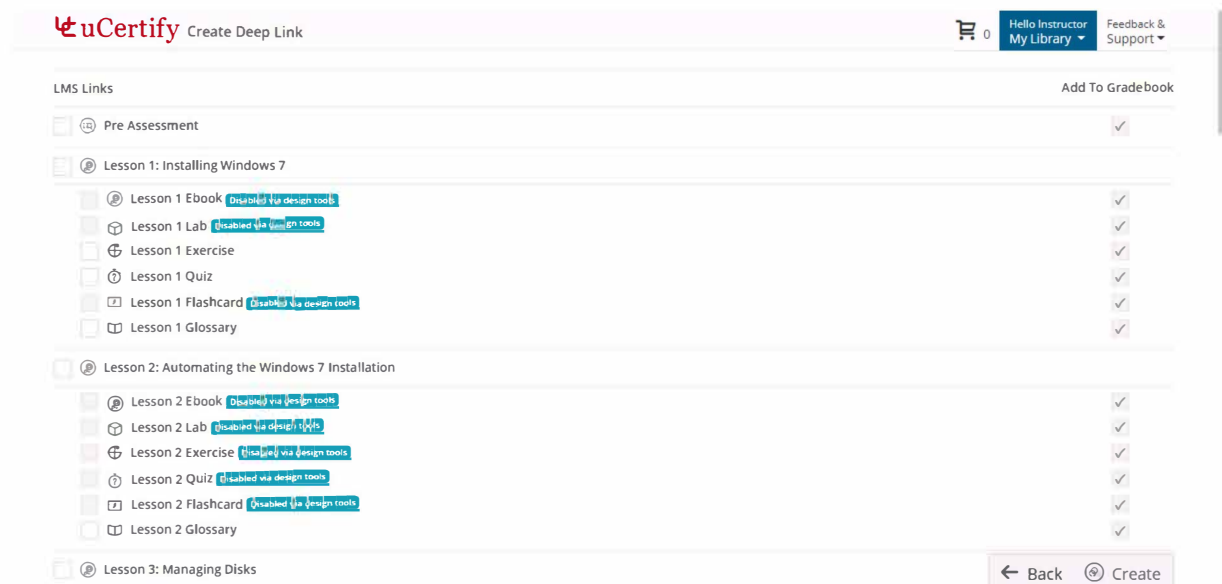

Click the Continue button. The Select Master Section modal box will appear.

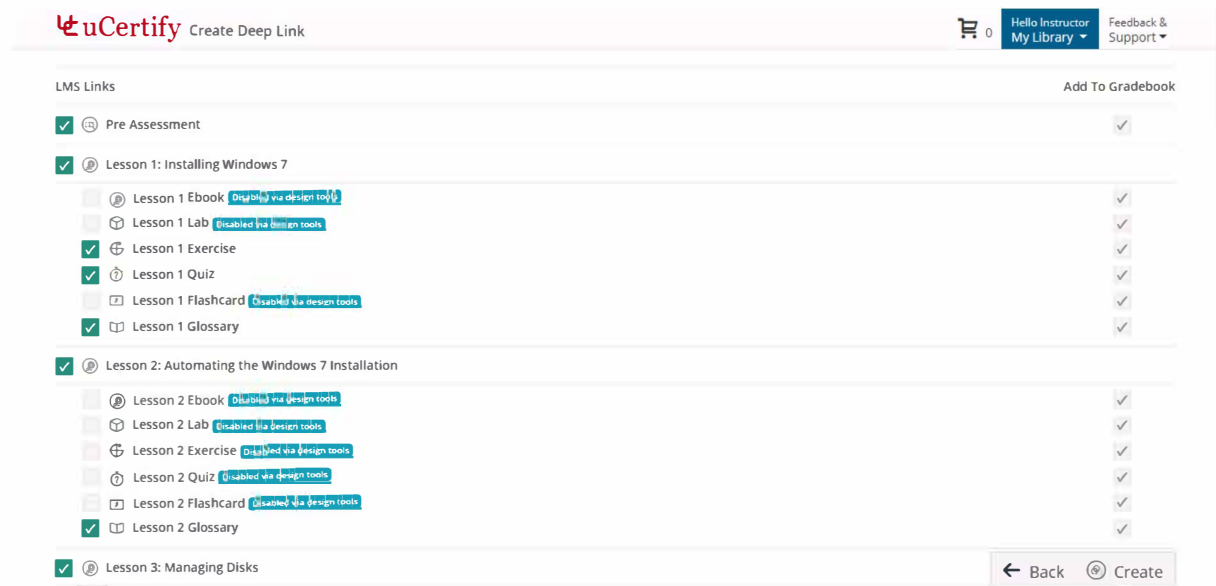

Select your created master section from the Select an existing section drop-down or select Create a new section radio button for creating a new section. Click the Next button.

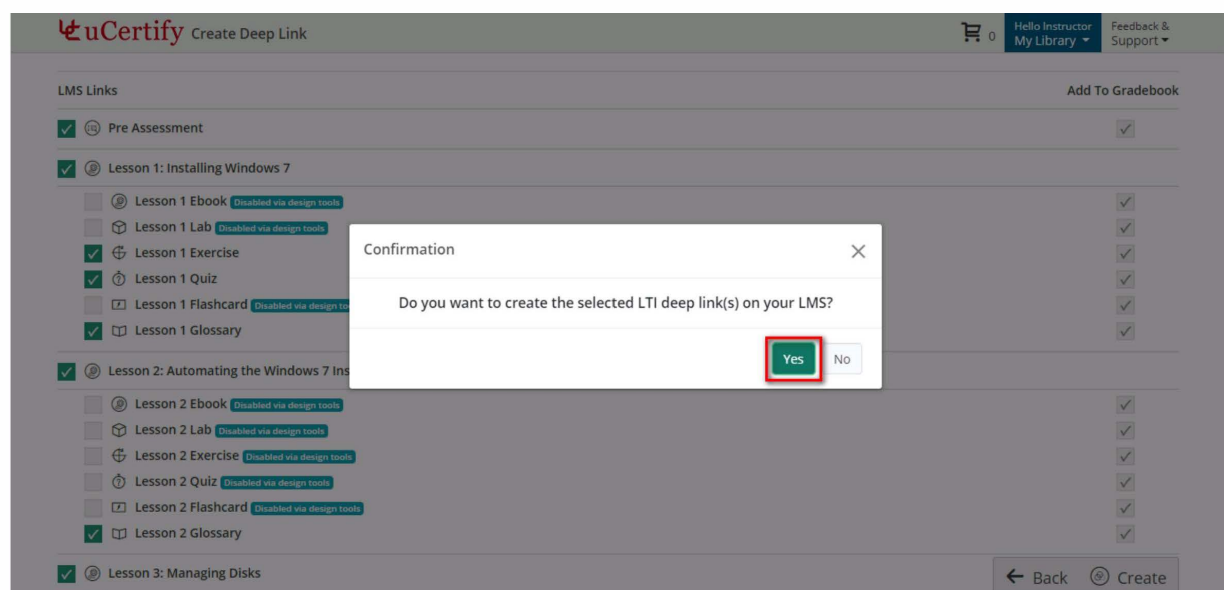

After clicking the Next button, It will redirect you to the Create Deep Link page of uCertify.

Select the deep links and click the Create button.

A Confirmation modal box will open. Click the Yes button for creating selected Deep links on your LMS.
