Major Change (Section A & B) Minor Declaration/Change (Section A & C)

Changes in major [programs](#) are made on the basis of careful consideration and planning. Any change from one major program to another, especially if made late in the student's college career, may necessitate additional courses that were not required in the major program originally selected. Additional semesters in residence may also be necessary. Both the accepting and releasing departments must approve a change of major program. Freshman making these changes should obtain approval from the [Centralized Advising Office](#). Many academic departments have minimum GPA requirements for admission. Students who change their major or interrupt their college work for more than a year become subject to the requirements of the catalog in effect at the time of the change or re-enrollment, as they fulfill degree requirements.
