INTRODUCTION

This report is a summary of the perceptions of two groups of alumni who graduated: those who graduated one year ago and those that graduated five years ago. Surveys were sent to students who graduated during the academic year 2007-2008 (Fall 2007, Spring 2008, and Summer 2008) for the one year out population and those who graduated during academic year 2003-2004 (Fall 2003, Spring 2004, and Summer 2004) for the five year out population. Surveys were mailed to alumni at the address on file with Alumni Relations. Response rates were 8.1% for the one year population and 8.3% for the five year out population.

It is anticipated that these results will be used by colleges and departments as one indicator of the effectiveness of the University’s programs and services.

Data analysis and creation of the report were completed by Jessica T. McCorkel, Institutional Research Analyst and Natalie Villa, Graduate Assistant.

We invite you to explore the results shown on the following pages and welcome any comments and suggestions for future analyses.
