

Valdosta State University Student Health Center

It is the policy of the Valdosta State University's Health Services to comply with the mandatory immunization program established by the Board of Regents of the University System of Georgia. These requirements include documented proof of immunity to measles, mumps, and rubella, varicella (chicken pox), tetanus, diphtheria, pertussis and hepatitis B, prior to registration at any college or university within the University System. This policy helps to ensure the health of all students by reducing the possibility of communicable diseases on the Valdosta State University campus. Since you are enrolled in an online or distance learning program, you may be waived from the Immunization Form policy by filling out the attached waiver and returning it to the University Health Center.

Immunization Form Waiver for Online and Distance Learners

I, (print name) _____ confirm that I am enrolled in an online or distance learning program only and do not plan on taking courses on the campus of Valdosta State University and therefore waived from having to complete the Immunization Form. I understand that should I, at any time, register for a course on the campus of VSU I will be required to complete an Immunization Form and submit it to the University Health Center to avoid a hold being placed on my account.
