****EXTENDED ORAL PRESENTATION OR PAPER** – In consultation with the instructor, the student will decide whether to give an extended oral presentation or write a paper. In either case, two or more primary scientific articles in a particular area of microbiology will be chosen, along with one review article. These articles will be chosen in consultation with the instructor. After thoroughly reading the article(s), the student will do one of the following: (i) give a 45-minute presentation on the papers during class or (ii) write a paper that provides background and also discusses the primary scientific articles. The oral presentation or paper must show that the student has **synthesized and analyzed** the material from the three references. A suitable day for the presentation will be chosen after discussion with the instructor.
