# Technology Expectations

## Mass Media

---

Technology is an important part of the educational experience. In many cases the technology may not be used in class but will be required to complete class assignments. Determining what technology is needed can often be confusing to students and their parents. To alleviate this confusion, the Department of Communication Arts created technology recommendations, designed to help ensure that students have the computer technology they need.

### Software

The Department utilizes four software packages in a majority of its classes. For video production Avid Media Composer, Avid ProTools, and Adobe Cloud (Premiere, After Effects, Photoshop, Illustrator) are the primary platforms. The Department provides access to Avid Media Composer and Pro-tools via the computer lab. Adobe Creative Cloud is also available on lab computers.

The faculty in the Department suggest that students have Adobe Creative Cloud and Microsoft Office 365.

Adobe Creative Cloud is available at

<http://www.adobe.com/creativecloud/buy/students.html?promoid=65FN7X8B&mv=other>.

Office 365 is available from the University at

<https://www.valdosta.edu/administration/it/helpdesk/vsu-accounts/office-365.php>.

Students will utilize a number of open source or free applications in various courses within their program of study. These applications include:

- Socrative
- Storify
- Real Statistics Add-in for Excel
- Zotero
- Grammarly (available by site license from the Department)
- Freemind
- Scripting software (Adobe Story, Scrivener, Final Draft, Trelby, Scriptbuddy)

### Hardware

We recommend an **Apple MacBook Pro 15"** with 16 gb of ram.

## Peripherals

The department also recommends that Mass Communication students purchase the following:

- a 16 gb **SDHC Class 10 SD card** (e.g., Sandisk Pro Extreme SD) for use in video cameras.
- at least a 1-2 tb portable **External Hard Drive** for storing projects and for backup. Students should plan on the purchase of a second external drive at the beginning of their Junior year. This drive should be used exclusively for Mass Media productions. If you wish to backup other materials, you should plan on using a second drive.
- **carrying case** or laptop backpack.
- the extended **four-year warranty** for the laptop with accident protection.
- **Over the ear headphones** such as the Sony MDR7506 or Audio-Technica ATH-M50x

## Financial Assistance

It is often possible to obtain financial assistance to purchase a computer. The Higher Education Amendments of 1998 allow for the purchase of a personal computer and software costs to be added to a student's educational expense budget that is used to determine financial aid eligibility. A budget increase does not necessarily result in additional financial aid to cover the cost. Students who have borrowed their annual or aggregate loan limits may not have eligibility remaining.
