

Exemplar Case Guided Reflections: Grading Rubric

Each student will be expected to watch sessions of a couple case which includes the pre, break, and post session conversations with the supervisor, therapists, and practicum team. The hope in having students observe these cases is to facilitate a better understanding of what is therapy, what it means to view problems from a systemic lens, how to think about change from a relational postmodern perspective, and how change from this lens may be facilitated with actual clients.

The answers to the questions will be evaluated on the following:

Graduate level writing: All written work should be completed at the highest level. Your writing should be thoughtful, clear, and organized.	
Critical Thinking/Analysis: How well were you able to comprehend and engage with concepts/questions? How well were you able to explore the questions posed? Did you provide a thoughtful in-depth response which critically explores the questions and apply systemic ideas
