

Summary of Clinical Work: Grading Rubric

In an ever increasingly competitive job market, a quick picture of your clinical work can help set you apart from other candidates that are applying to the same position. For this assignment, you will need to turn your client contact hours into several visual graphs to highlight the breadth and depth of your clinical experience. You are required to complete a minimum of three graphs and include these in a 1-page document which should be submitted to blazeview. These graphs should highlight your experience which assist you in being competitive for the job position you are applying. All graphs should contain a title, legend, and a short description of what the graph is illustrating (1 or 2 sentences). See APA to meet the expectations for formatting.

The summary of your clinical work will be evaluated on the following:

Graphs: 2 Graphs included, which highlight experiences that fit the job announcement	/5
Presentation of Graphs: Organization, formatting (APA), and description	/5
Loss of points for not following directions	
TOTAL	/10
