Admission Requirements

Students interested in pursuing a Bachelor of Science in Exercise Physiology should declare their major as Health Sciences with an Exercise Physiology concentration. Minimum requirements to be considered for admission to the program are:

1. a declared Exercise Physiology concentration.
2. completion of all courses in Areas A-F of the Core Curriculum as it pertains to the Exercise Physiology curriculum.
3. a 2.00 cumulative, overall grade point average.
4. a grade of "C" or better in all Area A, D, and F courses, including lab sections. Students not earning a "C" or better in Anatomy 1 and Anatomy II after 2 attempts in either course (excluding a withdrawal pass) are not eligible for admission to Exercise Physiology.
5. Program Progression and Retention.
6. Once admitted into the program, classes are taken in blocks, 1 through 4, in sequence. To be eligible for any third block courses, students must have earned a "C" or better in all first and second block courses. An exception to the third block policy is having to repeat just one second block course. To be eligible for HSEP 4510 Practicum, students must be in good academic standing, must have a returned graduation application from the Registrar and be currently enrolled in all remaining courses required for graduation excluding HSEP 4550 Internship. To be eligible for the fourth block internship (HSEP 4550), students must be in good academic standing as per VSU policy, must have a "C" or better in all third block courses and meet all other prerequisites for the course.

Major Requirements

A "C" or better in all B.S.E.P. coursework at the 3000 and 4000 level and a 2.0 cumulative overall grade point average.
